# **ABOUT US**

## **OUR COMPANY PROFILE**

A beautiful premises is desired by all and there are many goods available in the market that enhances the beautify of a place like the timber made items. We at Chivas Plywood Private Limited is in the domain of producing Laminated Plywood, Shuttering Plywood, Plywood Board Sheet, Sunmica Sheets, Designer Sunmica, Sunmica Designer Sheets, etc.

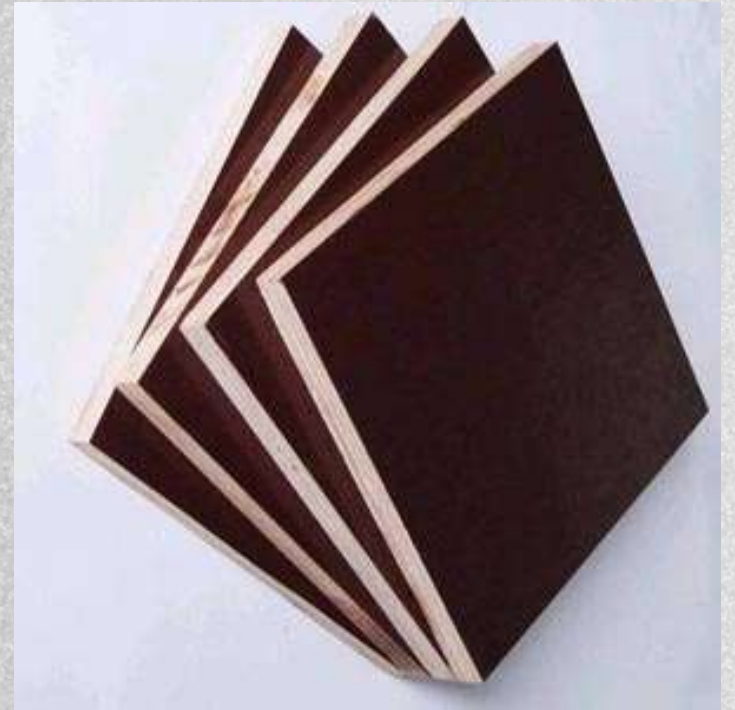

Our company was established in the year 1976 and is located in New Delhi, India. We are a leading manufacturer, supplier, trader, importer and exporter of high quality timber products. Our team of in-house designers makes out the best designs from the raw material and manufacture items that is perfect on every ground of qualities.

## FILM FACED SHUTTERING PLYWOOD

We being the most reliable Flush Doors manufacturer and Flush Doors supplier of India, design and fabricate flawless range of Flush Doors. Our manufactured array of flush doors are manufactured using a composite construction of Solid Timber components. In order to make Flush Doors capable of tolerating high weight, our competent professionals press them at high temperature and pressure, during production activity. Additionally, we offer these doors to our valued patrons in various sizes and thicknesses as per their requirements.

### **Some of the salient features of our offered product line are:-**

- Resistance against harmful organisms
- Termite-proof
- Longer service life

## LAMINATED PLYWOOD

Decorative veneers for connoisseurs of refined taste. An assortment of more than hundred exotic wood species, Modak ply Decorative Veneers, has been exclusively hand-picked from all over the world. The range imparts timelessness of wood décor to living spaces. A perfect reflection of aesthetics, natural value, durability and pro-environment sensitivity, Modak ply Decorative Veneers is for those who revel in making distinctiveness, a statement of living.

Laminate panels are used instead of plywood because of their resistance to impact, weather, moisture, shattering in cold (ductility), and chemicals. Laminate panel layers (called veneers) are glued together with adjacent plies having their grain at right angles to each other for greater strength. The plastic layer(s) added for protection vary in composition, thickness, color and texture according to the application.

## MEDIUM DENSITY FIRE BOARDS

Thoroughly tested medium density fibreboard panels for use in public buildings where fire retardant panels are required by building regulations.

Fire Retardant MDF is suitable for use in internal dry conditions for non-structural applications; ideal for applications such as wall linings, partitions, display panels and so on.

The product is available in a range of thicknesses with either a Euroclass B or C fire rating in accordance with European Standards. The boards also carries 60 minute (Euroclass B) and 30 minute (Euroclass C) fire ratings under BS 476: Part 22: 1987 for use as an internal wall partition.

## WOODEN BLOCK BOARDS

Leveraging on our advanced infrastructural amenities, we are able to export and manufacture a broad stock of Block Boards is made up of high quality timber and innovative machines under the supervision of our diligent professionals.

Offered boards are used for interior usages such as for making tables, doors, shelves, and partition walls. This board is widely appreciated for its durable finish standards, attractive look, compact design, fine finish and sturdiness. In addition to this, the provided block boards can be availed from us at nominal prices within the promised time span.

## ARTIFICIAL GRASS CARPET

Every home owner dreams to have a beautiful and attractive home outdoor. That is the reason the need for smart investment in the right kind of landscaping services has also soared up. If you are seeking the most long-lasting and safest landscape cover for your garden or lawn, then you are at the right place. Namgrass is the most asked-for and integrated European brand offering artificial synthetic grass turf India, the pole to pillar solution to surface cover gardens, lawns, public places and play grounds.

Apparently, fresh natural green grass is what comes in your mind when you think of landscaping. Isn't it? Here are few specifications why Namgrass artificial & synthetic grass will save your time, energy and money.

## PVC FLOORING BOARD

Carpet is a soft floor covering made of bound carpet fibers or stapled fibers. Carpeting refers to wall-to-wall coverage, whereas a rug is simply used to cover a space. This type of flooring is typically used indoors and can be used in both high and low traffic areas. It typically lasts for 15-18 years before it needs to be replaced. The quality of a carpet is usually measured in face weight, or how many fibers there are per square inch. The higher the face weight the more plush a carpet will feel.

Many different species of wood are fabricated into wood flooring in two primary forms: plank and parquet. Hardwoods are typically much more durable than softwoods. Reclaimed lumber has a unique appearance and is used in green (environmentally responsible) building.

## WOODEN FLUSH DOORS

A flush door has a wooden frame over which plywood, MDF or natural wood is fixed on both the sides. The hollow parts are filled with cardboard material. The flush door is usually imparted a laminate, veneer or paint finishing in various designs and colours. The thickness of flush doors range from 25mm to 40mm.

## GURJAN PLYWOOD

Gurjan plywood, made from the wood of the Gurjan trees (pronounced as Garjan) is quite popular in India and other South-East Asian countries. The medium hardwood obtained from these trees is of a good quality and is engineered to produce the Gurjan plywood sheets that we use. These trees grow in abundance in most South East Asian countries. The Gurjan wood available in India is often imported from other countries (such as Burma, Indonesia, Malaysia) and is quite expensive.

Compared to teak wood Gurjan is slightly heavier and stiffer, and has excellent strength, durability and a beautiful reddish-brown colour. While in India it is called Gurjan plywood, in other countries it is also known by the name Keruing plywood.

## WATERPROOF PLYWOOD

Our consistent efforts and dedication enable us to carve a niche as a most trustworthy exporter and manufacturer of Water proof Plywood in various sizes, patterns and designs. Our Water proof plywood is primarily utilized for designing boats, ship, docks and yacht. It is manufactured utilizing cutting-edge technology and best grade wood in compliance with international norm.

This Water proof plywood is also tested on different quality standards under the vigilance of our quality controllers. The entire collection is acknowledged for compact design, moisture proof, durability and fine finish.
